

Φ10 LED Lamp

Thanks for browsing our website! As a quality conscious LED lamp manufacturer in China, we at Kena consistently strive to satisfy customers by providing high quality LED lighting.

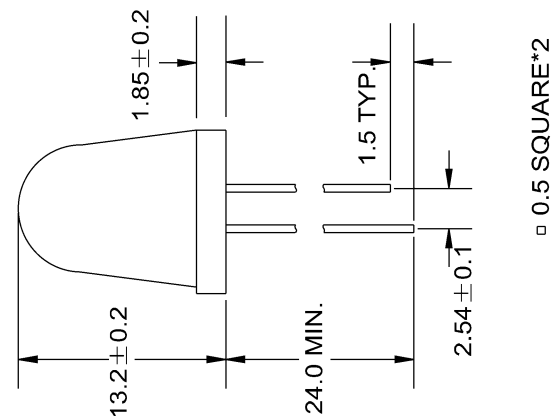

Our Φ10 LED lamp uses light-emitting diode, a semiconductor light source. It can be used as indicator lamps in many devices, traffic lights, car lights, and is also increasing used for general lighting. Unlike compact fluorescent bulbs, our Φ10 LED lamp contains no mercury and starts instantly. In addition, it features large scattering angle, good luminous uniformity, long service life, and can emit light in a variety of colors, including pure blue, pure green, pure white, orange red, yellow, etc.

Main Technical Specifications of Φ10 LED Lamp

110.0*13.2mm round (coniform), without flange LED lamps

Package Dimensions (mm)

| Part Number | Chip Material | Lens Type | Emitting Color | Forward Voltage (V) | | Dominant Wavelength (nm) | | Luminous Intensity (mcd) | | Reverse Current (μA) | Viewing Angel (deg) |
|-------------------|---------------|----------------|-----------------|---------------------|------|--------------------------|-----|--------------------------|-------|----------------------|---------------------|
